

YOUR SMARTPHONES PROTECTED FROM CYBERATTACKS

# MTD

#### Mobile Threat Defense

Installed in a few seconds, the **TEHTRIS MTD** application offers a unique protection by detecting and neutralizing in real time any types of attacks and suspect behaviors on your smartphones.

### Gartner

TEHTRIS recognized as a Representative Vendor in the 2021 Market Guide for Mobile Threat Defense 2021\*

## Your cell phone, the neglected vulnerability of your information system...

Access to emails, directories, downloading files, mixing private and professional uses... information inside your smartphones are sensitive. As an underestimated access point to your IT assets, your mobile fleet needs to be protected more than ever.

## Mobile Detection & Response in **REAL TIME**

Android, iOS, iPadOS, Chrome OS

- Quick installation (Cloud)
- Lentralized control & unified console
- Control your applications from installation to update
- Available on Android, iOS, iPadOS and Chrome OS

#### **TEHTRIS MTD**

detects and responds to attacks on your mobile fleet in real time.

Its threat knowledge base - connected to the TEHTRIS CTI (Cyber Threat Intelligence) - is updated 24/7 to identify, detect and respond to all types of threats: from the installation of a malicious application to its update (including system applications), brute-force attempts and man-in-the-middle attacks, or the discovery of

vulnerabilities in the local configuration, thanks to its low-level scanning library.

A real-time protection combined with vulnerability hunting: security flaws are immediately detected on iOS, iPadOS, Android and Chromebook. Remediation is performed automatically and preserves your mobile fleet by reducing the attack surface, notably by DNS isolation of corrupted devices.

#### BENEFITS

#### EFFICIENCY

- Fast deployment
- Compatible and complementary with EMM/MDM
- → Automatic remediation

#### CUSTOMIZABLE

- Customizable settings for security policies
- Application blacklisting
- Remediation scenarios (Playbooks)

#### AUTONOM'

- Security scans performed in the background
- Centralized monitoring from the console

## Full visibility on your mobile fleet

TEHTRIS MTD can be installed and deployed quickly to ensure 360° protection & vision of your mobile fleet.

With BYOD or MDM, the application is deployed without any modification of the mobile settings and without any action required from the user. The protection of your fleet is operated remotely in SaaS, including configuration, integration, deployment, and maintenance in operational conditions. You benefit from a dedicated virtual machine to manage your fleet, deployed in the fully secured TEHTRIS cloud.

As a TEHTRIS customer, you are informed in real time through TEHTRIS MTD of attacks on your fleet by receiving security alert notifications from the TEHTRIS XDR Platform.

including brute-force & TLS interceptions called man-in-the-middle attacks.

Push Notification stay informed in real time and

TEHTRIS XDR Platform in case of a critical alert on your fleet.

optimize your reaction time to alerts

**Your SOC** 

#### **REAL TIME DETECTION**

#### 24/7 Monitoring

- APK: Detection of malicious or unknown applications
- Access:

Events related to the enrollment of a device and alerts related to the connection to a new Wi-Fi spot

- DNS: DNS Firewall notify connection attempts to a malicious domain name
- Event Log: Tracking of actions performed remotely on the phones
- ▶ Brute-force attacks
- TLS Interception detection (Man-In-The-Middle Attacks)

#### Investigation & IOC Hunting .....

CVE Applications & targeted hunting

#### **Security scan**

- Rights allowed and authorizations of applications analysis
- Static and dynamic code analysis (MAST - Automated Mobile Application Security Testing)
- Low-level analysis: 50+ continuous security tests
- Detection of an illegitimate debugging process
- Rootless Jailbreak detection
   Unwanted third-party blind detection
   Malicious library injection detection

#### **COMPLIANCE**

- Adaptability of the bruteforce
- Customization of the minimum security for unlocking the device
- Applications & DNS Blacklist / Whitelist
- GPS location
- List of WI-FI networks used

### KEY FUNCTIONALITIES

#### **AUTOMATIC REMEDIATION**

- Remote wipe of the mobile
- Uninstalling applications via MDM
- Removing applications via MDM
- Application and domain names blacklist
- Targeted DNS Isolation

#### **DASHBOARDS & REPORTING**

### Unified console for a complete visibility 24/7

- Rooted / Jailbroken Mobiles
- Compromised Mobiles
- Non-Compliant Mobiles
- TEHTRIS MTD deployment indicators
- OS mapping

### Historization of security data for better traceability

- **DNS**
- Geolocation
- Security scan history

#### Security Checks .....

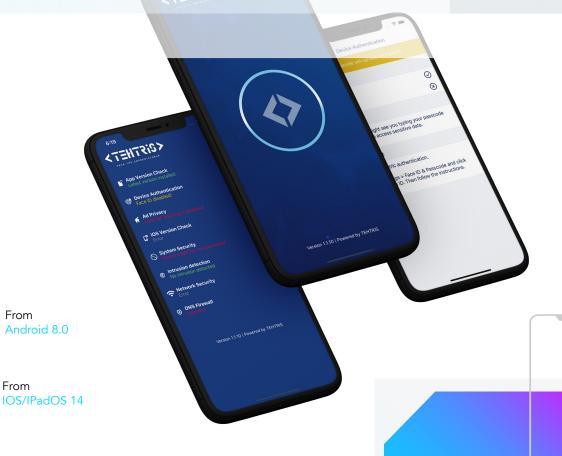

- Low-level analysis reports
- Operating system reports

#### **ALERTS**

- Alerts & Events
- Event qualification
- Send customized push notifications
- Critical security alert through our integrated SOAR

TEHTRIS MTD saved us from an attack on a Jailbreak device. The attack was stopped immediately, and all cell phones continued to work without interruption. Day to day, our work is simplified. Central mobile management has become a must for our team.
